

About the Institute:

Mewat Engineering College (Wakf) is a unique venture of Haryana Waqf Board, Government of Haryana, in district Nuh, Mewat to impart quality higher technical education to the students of all sections of society. It was started in the year 2010-11 with four streams, ME, EEE, CSE and ECE leading to B Tech degree course. Seeing the success and great demand, a new stream of Civil Engineering was started during session 2011-12. It has been approved by All India Council for Technical Education (AICTE), New Delhi & Directorate of Technical Education, Haryana and affiliated to Maharishi Dayanand University (MDU), Rohtak, Haryana. It has been granted the status of Minority Institution by the Government of Haryana. However open to all communities.

HAREDA

Haryana Government has set up Haryana Renewable Energy Development Agency (HAREDA) in May, 1997. It is acting as a nodal agency to implement the various centrally and state sponsored schemes/projects in the area of renewable energy in the State. It is responsible for formulating policies and programmes necessary for popularizing the applications of various non - conventional and renewable sources of energy in the State.

Scope of the Conference

The primary scope of the International Conference on Recent Trends in Renewable Energy and Advancement in Engineering & Technology (RTREAET-2021) is to bring global professional engineers, academicians and researchers of matching interests on a common platform to share novel ideas, experiences, and knowledge in different fields of Science and Engineering Technology.

Call for Papers

Original and unpublished research papers are invited related to following sub-themes of the

conference, but not limited to:

- Renewable Energy sources
- Smart grid, sensors, instrumentation, artificial intelligence and IoT aspects
- Energy and environmental aspects
- Design, modeling and simulation aspects
- Signal Processing and Communication
- Controller based Engineering and Technology
- Industrial and production aspects
- Computational Methods for Engineering and Technology
- VLSI and Nano Electronics
- Digital System Design
- Mathematical modeling and computational Analysis
- Applied Science and Engineering
- Machine Design Thinking
- Image processing and Cloud computing based Applications
- Physics, Chemistry and Biosciences
